The Associate in Arts in Geography for Transfer degree provides students with a foundation in Geography for continued training at the upper division level for Geography majors. It also provides students a foundation for majors in environmental science, geology, geographic information systems, and natural sciences. Geography majors are increasingly needed to understand environmental changes and human impacts on the environment. Earning a degree in geography is a starting point for careers as surveyors, cartographers and photogrammetrists, surveying and mapping technicians, urban and regional planners, and geoscientists.
