

PHYSICS

DIVISION: Natural Sciences

Physics is the study of the universe, explaining observations of the tiniest subatomic particles to the motion of galaxies. PCC offers physics courses that encompass a broad range of topics at several different levels, from conceptual to calculus-based.

Take a course in physics to satisfy a GE requirement or to prepare for transfer in a STEM field. Consider completing the AS-T in Physics to build a foundation for your major in physics or a number of related fields, such as chemistry, physical science, engineering, or computer science. Learn how the universe works and be prepared for a 21st century career!
